## **CALIFORNIA TRANSPARENCY IN SUPPLY CHAINS ACT**

To Whom It May Concern,

Florida Bulk Sales, Inc. works with vendor partners around the world to supply the highest quality juice concentrates to our customers in the manufacturing sector. Though we do not supply product for retail sale, we do understand that our customers want to ensure they adhere to the local laws and regulations of their final consumer.

The California Transparency in Supply Chains Act applies to retailers in California that have over \$100,000,000 in business receipts. Though Greenwood Associates is not considered a retailer, we understand that some of our customers may fall into this category. As such, Greenwood Associates complies with all local and federal legislation regarding the fair right to work and compensation of employees.

Florida Bulk Sales, Inc. does not perform third party social responsibility audits of our vendors, however the vendor sites are audited by third party audit firms. Additionally, we are in the process of asking all of our vendors to send statements ensuring they are in compliance with their local and federal legislation, as well as internationally recognized standards of maintaining fair labor practices and compensation packages for their employees.

If you have any further questions, please contact me at your convenience.

Best regards,

*SM Nolan*
